COE 379L: Homework 7

Ashton Cole

March 16, 2024

1 Introduction

- 2 Methodology
- 2.1 Setup and Execution
- 2.2 Jacobi Method
- 2.3 Parallelization
- 3 Results
- 3.1 Exercise 8: Speedup Tests

Table 1: Parallelization speedup tests for various problem sizes.

Vector Size	100	100,000	100,000,000	
Threads	Elapsed Time (s)			
1	0.:	2.526	24.719	
2	0.047	1.321	12.524	
4	0.066	0.737	6.456	
8	0.139	0.709	4.715	
12	0.213	0.727	3.605	

3.2 Exercise 9: Performance Improvements

Table 2: The impact of performance improvements on a large problem size. Case \mid n = 1,000,000 $\underline{\hspace{0.2cm}}$ nowait Affinity First-Touch

n = 1,000,000	nowait	Affinity	First-Touch
Elapse	d Time (s)		
24.719	23.736		
12.524	11.900		
6.456	6.093		
4.715	4.693		
3.605	3.401		
	Elapse 24.719 12.524 6.456 4.715	Elapsed Time (s) 24.719 23.736 12.524 11.900 6.456 6.093 4.715 4.693	Elapsed Time (s) 24.719 23.736 12.524 11.900 6.456 6.093 4.715 4.693

- 3.3 Exercise 10: Scheduling Improvements
- 3.4 Exercise 11: Full Parallelization
- 4 Conclusions
